Very Low Profile Module

ACLW-CW-VLP for 2" Deep Signs

**Very Low Profile
Module**

*Very Wide Beam for
Shallow Applications!*

Product Details

- 165° beam angle for very low profile even illumination down to 2"
- Wide beam spreads the light across the sign face
- Fewer LED modules required
- Batwing lens design insures even light distribution in shallow sign configurations
- Provides even light across 8" stroke with one run of modules
- 55,000 hours average life
- 6500°K for brighter and whiter sign faces

MODULES -01-2015
